-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, drawn to a method for preparing an enzyme containing granule wherein the shell is applied to the enzyme containing core at least one day after preparing said enzyme containing core, classified in class 108, subclass 114 for example.
- II. Claims 19-27, drawn to a method for preparing an enzyme containing granule comprising storing the enzyme containing core for at least one day after preparing said enzyme containing core and before applying the shell to the enzyme containing core, classified in class 424, subclass 94.1 for example.
- III. Claims 28-31, drawn to a method for preparing an enzyme containing granule comprising shipping the core to a geographic location separate from where the geographic location where the enzyme containing core was prepared, classified in class 510, subclass 374 for example.

- IV. Claims 32-41, drawn to a method for preparing an enzyme containing granule wherein the preparation of the granule is finished at least one day after preparing said enzyme containing core, classified in class 426, subclass 42.
- V. Claim 42, drawn to a method for preparing an enzyme granule comprising finishing the preparation of the granule one day to five years after preparing said enzyme containing core, classified in class 424, subclass 489 for example.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions The methods of Groups I -V are independent since they are not disclosed as capable of use together, they have different modes of operation, they have different functions, and/or they have different effects. One would not have to practice the various methods at the same time to practice just one method alone. The search for each of the above inventions is not co-extensive particularly with regard to the non-patented literature search. Further, a reference which would

anticipate the invention of one group would not necessarily anticipate or even make obvious another group.

Because these inventions are distinct for the reasons given above and the search required for each Group is not required for the others, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
